## Skills

Core Java | Php | Html | Css | JavaScript | React | MongoDB | MySQL | Git | Github

## Projects

### HOLIDAY TRAVEL WEBSITE:

Feb'24

**Role:** Frontend & Backend Developer

**Tech Stack:** Bootstrap, PHP, MySQL, AWS

- Designed and developed a hotel reservation module, enabling users to search for hotels based on location, dates, and price range. Implemented a booking request submission system for users.
- Displayed detailed hotel information, including room types, availability, and pricing.
- Executed a booking request submission system for users.
- In Admin Panel, Admin can upload multiple hotels with excel in database and set the CRON Jobs for flash sales.

### ACTIVITY, TRANSFER MODULE:

Des'23

**Role:** Full Stack Developer

**Tech Stack:** Bootstrap, PHP, MySQL, AWS

- Integrated leading activity and transfer APIs into travel platform, expanding travel options for enriched user experience.
- Developed a user-friendly search interface for activities and transfers, allowing users to filter by location, date, and type.
- Improved decision-making and customer satisfaction through streamlined activity and transfer booking functionality.

### CRM MODULE:

Aug'23

**Role:** Full Stack Developer

**Tech Stack:** Bootstrap, PHP, MySQL, AWS

- Enabled offline data entry for customer and booking details via a CRM mobile app and desktop application.
- Applied an agent search feature for retrieving previous invoices and pre-filling forms for new customers.
- Enhanced efficiency by streamlining access to historical booking information for agents.
